

Tire Pyrolysis Oil Analysis (This is approximate and may vary a small amount depending on feed stock)

Calorific Value	Kj per Kg 35,500
Nitrogen Percentage	.51
Hydrogen Percentage	10.1
Sulphur Percentage	1.19
Water Content Percentage	1.05
Carbon Residue Percentage	2.81
Ash Content Percentage	Non Detected
Carbon Percentage	81.2
Viscosity	Varies depending on feed stock
Flash Temperature C	63
Density Kg/L	1.1 to 1.2
